Subject: 20-CP (Construction Stormwater General Permit) - Maryland
Attachments: 20GP_AppendixA (to EPA 10-18-2019).pdf; 20CGP0000 General Permit Draft (to EPA 10-18-2019).pdf; 20CGP0000 General Permit Fact Sheet (to EPA 10-18-2019).pdf; 20CP TD draft public notice (MD Register) (to EPA 10-18-2019).pdf

Dear Elizabeth Ottinger,

I am enclosing Maryland's recommendation renewal pertaining to the State/NPDES General Permit for Stormwater associated with Construction Activity, including the draft permit, the draft fact sheet, appendix and public notice. This project is being sent for review because it is considered a Major Industrial Permit.

The Memorandum of Agreement states that the Regional Administrator must concur, in writing, with the effluent limitations and other conditions as specified in the proposed permit. We would appreciate your notification of concurrence or proposed modifications within 90 days of receipt of this email. If you have any questions or comments, please contact Paul Hlavinka, paul.hlavinka@maryland.gov or call at (410) 537-3631.

For reference, I am also including this link to our existing permit language. [Text of the 2014 General Permit](#)
